RESEARCH EXPERIENCE

A. ROLES

Nov 2023–Feb 2026 **Postdoctoral research fellow** for “Echoes from the Past: Unveiling a Lost Soundscape with Digital Analysis,” Research Project funded by the Fundação para a Ciência e a Tecnologia (FCT) of Portugal and led by Elsa De Luca, Centro de Estudos de Sociologia e Estética Musical (CESEM) and Faculdade de Ciências Sociais e Humanas at Universidade NOVA de Lisboa (NOVA FCSH). I lead the development of a prototype tool for the analysis of chant melodies called the Plainchant Analyser for MEI Neumes (see the [PAM](#) GitHub repo), and worked on a GABC to MEI (see the [GABCtoMEI](#) repo) transformation script to generate the initial corpus of PAM (now in [PAM-MEI-Database](#) repo). I also lead the work on improvement of the current workflow for optical music recognition used by the SIMSSA project within Rodan that works with square notation to adapt it to work with neumes in Aquitanian music script (see the resources generated for this in [OMR Portuguese Sources](#) GitHub repo and various pull requests to the [Rodan](#) repo).

Feb–Nov 2023 **Postdoctoral research fellow** for the “LinkedMusic,” Research Project funded by the Social Sciences and Humanities Research Council (SSHRC) of Canada and led by Professor Ichiro Fujinaga, Distributed Digital Music Archives and Libraries

(DDMAL) Lab, Department of Music Research, Schulich School of Music, McGill University.

- 2015–2022 **Research assistant** for the “Single Interface for Music Score Searching and Analysis” (SIMSSA) Research Project funded by the Social Sciences and Humanities Research Council (SSHRC) of Canada and led by Professors Ichiro Fujinaga, DDMAL Lab, and Julie Cumming, Musicology, Schulich School of Music, McGill University. **Lab Manager** September 2020 to December 2021. I supervised students, trained new lab members, directed lab meetings, tested software for optical music recognition (OMR), prepared machine learning models for their use in OMR, tested data labelling strategies, prepared and reviewed documentation about the OMR process (see the [e2e-omr-documentation](#) GitHub repository), guided the OMR processing of medieval manuscripts (see the [e2e-omr-resources](#) GitHub repository), and worked on the development of a scoring-up algorithm for mensural notation (see the [scoring-up](#) GitHub repository).
- 2016, 2020–2022 **Consultant and developer** for “Measuring Polyphony,” a Research Project funded by the National Endowment for the Humanities (NEH) and led by Professor Karen Desmond, Brandeis University (now at Maynooth University). Developed the [Common Music Notation to Mensural MEI Translator](#) (2016) and the [automatic scoring-up functionality](#) of the [Measuring Polyphony Editor](#) (2020–21). Led the work on interoperability of the Measuring Polyphony Editor with the optical music recognition system *MuRET* (2021–2022), and the music analysis *humlib* library (2021–2022). Wrote the section of the [mens2kern](#) tool for translating mensural note durations, encoded in Humdrum `**mens`, to Common Music Notation note values, encoded in Humdrum `**kern` (2021).
